🛠 TryHackMe

SUMMARY

Certified Ethical Hacker (CEH) and BCA graduate seeking an entry-level Cybersecurity Analyst or SOC Analyst role. Proven capability across 50+ live-fire laboratory environments executing end-to-end vulnerability assessments, active reconnaissance, and network traffic analysis.

CERTIFICATES

Certified Ethical Hacker (CEH)
Ec-Council

Cyber Security Cadet - Ethical Hacking 2023
Udemy

Data Entry and Office Automation
NIELIT

SKILLS

Security Tools

Nmap, Burp Suite, Wireshark, Metasploit, Nikto, Openvas

Virtualization

VMware, VirtualBox

Web Security

SQL Injection, Cross-Site Scripting (XSS), Authentication Testing, Basic SQL

Operating Systems

Kali Linux, Ubuntu, Windows 10/11

Cybersecurity Concepts

Vulnerability Assessment, Penetration Testing, OWASP Top 10, SIEM Fundamentals, TCP/IP, IDS/IPS, VPN, Firewalls

PROJECTS

Information Security Home Lab Architect
Personal Infrastructure

05/2023 – Present

- **Environment Simulation:** Engineered an isolated virtual network architecture using VMware and VirtualBox hosting cross-functional Kali Linux, Ubuntu, and Windows instances.
- **Attack & Defense Emulation:** Configured legacy target machines to run unpatched services; safely simulated multi-stage attack scenarios to validate security baseline configurations.
- **Network Monitoring:** Conducted vulnerability scanning, packet analysis, and network monitoring in isolated environments to study system hardening techniques.

Cybersecurity Lab Practitioner 📄
TryHackMe Platform

02/2022 – Present

- **Vulnerability Assessment:** Completed over 50+ hands-on simulated environments covering automated scanning, active reconnaissance, and vulnerability verification using Nmap, Nikto, and OpenVAS.
- **Exploitation & Shell Management:** Utilized the Metasploit Framework to identify system loopholes, configure exploit payloads, and execute privilege escalation vectors safely within controlled target environments.
- **Web Application Testing:** Audited lab applications against the OWASP Top 10 framework, manually executing and mitigating critical flaws like SQL Injection (SQLi) and Cross-Site Scripting (XSS).
- **Traffic & Log Analysis:** Captured and inspected malicious network packets using Wireshark to understand protocol abnormalities and trace attack footprints.

EDUCATION

Bachelor of Computer Applications (BCA)
University of Kerala

2021 – 2024
